PROFESSIONAL SUMMARY

Backend Engineer with 3 years of experience designing, building, and deploying backend systems for e-commerce, job marketplaces, and real estate platforms. Designed PostgreSQL database schemas supporting access permissions for admin, staff, and customer roles. Built 15+ REST APIs with advanced filtering, webhook handlers for instant updates, automated reporting systems, payment gateway integrations, and JWT authentication, processing thousands of user interactions monthly and backend operations for core platform functions.

TECHNICAL SKILLS

Backend & API Development: Python, Django, Django REST Framework, REST APIs, JWT authentication, Webhook handlers, Reporting APIs

Databases & Data Management: PostgreSQL, MySQL, Database schema design, Access control, ORM optimization

DevOps & Deployment: Docker, AWS (EC2, S3), GitHub Actions, CI/CD pipelines

Payment & Integrations: Paystack, External API integrations

Testing & Documentation: Unit testing, API testing with Postman, Swagger/OpenAPI documentation

PROFESSIONAL EXPERIENCE

Software Engineer
Code Alpha Company | June 2025

Restaurant Management System

- Built server side logic for menu, reservations, order handling, and sales data, centralizing operations and processing thousands of orders and transactions each month.
- Configured JWT authentication with permission rules separating administrative, staff, and customer access paths at the API level.
- Linked inventory logic to order activity, updating quantities and generating periodic sales and stock reports used for recurring purchasing schedules and revenue assessment.

Job Board Platform

- Integrated backend services for job postings, applications, resume uploads, and filtered search, processing application submissions and notifications for active users.
- Designed relational database schemas and REST APIs for job listings, applications, and notifications, supporting approximately 1,000 user interactions monthly.
- Configured an admin dashboard to compile system reports and process application data, validating submissions and system operations.

Software Engineer
Torilo Tech Academy, Nigeria | Oct 2024 – 2025

E-Commerce Website

- Designed PostgreSQL database schemas and Django APIs, supporting product catalogs, user accounts, and order routing for 500+ transactions monthly.
- Deployed payment gateways and essential e-commerce features, completing checkouts and recording completed transactions.
- Mentored junior developers, guiding them to write readable, performant code, follow coding standards and independently build bug free features.

PROJECTS

Real Estate Backend System

Live Demo

- Processed thousands of property listings and transactions monthly through backend APIs built for property searches, payment processing, and webhook notifications.
- Improved communication between users and platform administrators by developing admin messaging systems and automated email notifications.

EDUCATION

Ecole supreruier de management Benin, Cotonou
B.Sc Computer Science | 2024

Obafemi Awolowo University
B.Sc Microbiology | 2019

CERTIFICATION & COURSES

Software Engineering Essentials Certification
Django REST Framework
